

WireFreeShop Partners with Travis Consulting to Provide VISUAL Jobshop® Business Solution for Small Manufacturers

WireFreeShop can now assist small engineer-to-order and make-to-order manufacturers by introducing VISUAL Jobshop®, a discrete manufacturing solution from Infor Global Solutions that helps them manage their shop floor, access real-time information, review critical reports, and improve productivity. VISUAL Jobshop is an integrated, quick-to-install, easy-to-use solution that includes tools for quoting, order entry,

inventory control, production, labor collection, shipping, and invoicing. It is an affordable system that offers easy to learn Microsoft® Windows® features, and customizable reports to help manage operations and position companies for growth.

By partnering with Travis Consulting, WireFreeShop customers will gain expert, personalized support and service when they decide to implement VISUAL Jobshop.

It's About Communication...

WireFreeShop is committed to helping businesses communicate effectively.

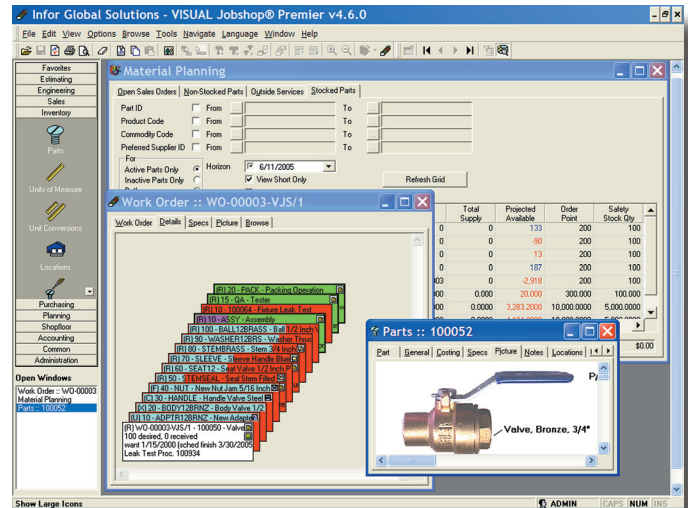

VISUAL Jobshop is a tool that helps business work more efficiently from managing quoting and scheduling jobs to purchasing materials and invoicing. By integrating these tasks into a single system, companies can rely on consistent, immediate information, increasing productivity and improving customer service.

VISUAL JOBSHOP

An affordable solution that helps you manage:

- > quoting and estimating
- > scheduling
- > purchasing
- > material planning and procurement
- > actual job costing
- > inventory
- > shop floor control
- > lot tracking
- > shipping and invoicing

VISUAL Jobshop also offers accounting integration, advanced reports, and automated QuickBooks® integration, as well as optional stand-alone labor data collection. Available in English, Spanish, and Simplified Mandarin Chinese, VISUAL Jobshop provides small manufacturers with an advantage for managing and streamlining operations.

EASE OF USE: VISUAL Jobshop allows users to create and view "combined" bill of material and routing structures using drag-and-drop technology.

VISUAL Jobshop is an Infor GS product

Position your shop for growth | Save time | Analyze costs | Gain consistent data
